## **DETAILED ACTION**

### ***Drawings***

1. The drawings (figs. 1-2) are objected for minor informalities. The figures 1-2 are not labeled as required by 37 CFR 1.83(a). Applicant is required to submit a drawing correction for approval as require by rule 37 CFR 1.123.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, recites a frequency converted laser apparatus using frequency converting crystals comprising an optical pumping source that produces fundamental laser radiation; an external resonator cavity having one frequency conversion crystal within said resonant cavity; or just beam path frequency converting crystals where the beam path direction of the crystals is checked according to the best output powered before installation. The claim fails to provide sufficient means or any structure for a frequency converted laser. The claim also recite "or just beam path" it is not clear what is "or just beam path" means. The claim also recites "according to the best output power before installation" it is unclear what is "the best output power" means, which render the claim confusing, vague and indefinite.

Art Unit: 2828

Claim 2, recites where the "to-be-used" direction of said frequency conversion crystal in the laser. It is not clear what is "well defined or clearly marked" means, which render the claim confusing, vague and indefinite.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Staver et al (US patent 5,953,354).

With respect to claims 1-2, Staver et al disclose laser resonator optical alignment comprising a laser cavity (10) is consider as a resonator cavity, an optical pump source (14), a laser medium (12) is consider as conversional laser crystal or a conventional Brewster angle, note cols 4-5, see fig. 1 below.

**FIG. 1****Citation Of The Pertinent References**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclose.

The patent to Stultz (US patent 5,687,186) discloses eyesafe laser transmitter with single resonator cavity for both pump laser and optical parameter oscillator.

The patent to Geiger (US patent 5,117,126) discloses stacked optical parameter oscillator.
